Stitching The High-End Needlepoint Kits

Synopsis

High-end needlepoint kits from companies like Ehrman, Cleopatra's Needle, Elizabeth Bradley, and others are popular for stitchers. But all too often buying them can end in disaster or abandoned projects. Did you know that with a few simple tricks you can-- get better results from your stitching-- make the kit a joy to stitch-- create individual results? In this book by Janet M. Perry, the Internet's leading needlepoint expert you can learn everything you need to know to stitch one of these kits beautifully, no matter what your stitching level might be. You'll learn how to prepare your canvas and threads, how to do two different kind of stitches for these kits, and how to create a lovely background. This book includes information essential for stitching kits but not included from the manufacturer. Try it and find out what a joy these kits can be.

Customer Reviews

This book did not provide insightful techniques nor tips that are not already included in the kits,

books by the kit designers, or gleaned from common sense. The information is not particularly fresh or innovative unless one has bought a "high end kit" with no prior knowledge of needle and thread and intends to ignore the instructions provided with the kit. The book did not live up to its product description. It could have easily been a guide for the embellishment of a kit canvas but seemed to be more of a back door advertisement for the "special offer" classes and other business ventures of the author that are listed at the end of the book.

very helpful as I wanted to increase my skills & attempt the better, high end of needlepoint projects. I found answers to a lot of my questions that I could not find elsewhere. worth reading.

I feel totally taken advantage of in buying this "book". The information offered and written here was entirely elementary to anyone who has every stitched in needlepoint. I am still trying to figure out her writing this "pamphlet" as anyone who stitches high-end canvases would already have known everything in her rendering. Her suggestions were totally amateurish to the accomplished stitcher. I feel I have wasted my money in buy it.
