Richard Bronson, Ph.D., is a professor and chairman of mathematics and computer science at Farleigh Dickinson University. He is an associate editor of the journal Simulation, contributing editor to SIAM News, has served as a consultant to Bell Telephone Laboratories, and has published more than 25 technical articles and books. He is the author of Schaum's Outline of Modern Introductory Differential Equations and Schaum's Outline of Operations Research.

It is a very well-written book by a famous author; it comes with many worked problems so readers could fully understand the contents. It provides a comprehensive coverage of the field and once you

have mastered the content fully, you would be able to self-study an advanced course in linear algebra.
