How To Live In A Car, Van Or RV--And Get Out Of Debt, Travel And Find True Freedom

Synopsis

How and why to live in a car, van or RV, and learn to love it! There are two main reasons you might buy a book on living in a vehicle: 1) You're being forced into it by a bad economy, divorce, or unemployment, or 2) The "American Dream" has become a nightmare for you and you are dropping out of the rat race. Whatever your reason, this book will tell you everything you need to make it the best possible experience it can be. We'll cover details like: which vehicle to live in and how to find it, where to park, staying clean, going to the bathroom, how to cook in a van, get out of debt, survive any bad economy, travel on a budget, how to get your mail, how to stay comfortable in the heat and cold, how to get electrical power, and so much more I can't list it all here. You may be asking yourself, does this guy know what he is talking about or is he just out to make quick buck with another crummy book? That fact that I've been living in a vehicle for over 10 years should ease your mind. But you can find out for yourself by going to my websites to see if I have information you may want: cheaprvliving.com, cheapgreenrvliving.com, cheaprvlivingforum.com and my blog at cheaprvlivingblog.com. I love my Kindle, but I have to admit that I've bought some books that I read in a short afternoon and thought "Where's the beef?" There just wasn't much too them. This isn't one of those books. My concern isn't that I've given you too little information, but too MUCH! I hope I don't overwhelm you with it all. When I typed the book in MS Word, it was 69 pages long and has 37,000 words. I tried to remember back to my first few months living in van, and answer every question you may have. I think I have, but let me assure you that if anything isn't clear I want you to write me through the websites, the forum, and my blog listed above, and I will do everything in my power to make it clear to you. Let me apologize for the inevitable writing and formatting errors in the book. I am not a professional writer, and I know next to nothing about html. What I am is a guy with a huge passion for vandwelling and a strong sense of empathy for anyone trapped in our society who wants to break out. I'm also a guy who, in the last 10 years, has made just about every possible mistake pertaining to living in a vehicle and would like to help you avoid them. By dogged persistence, and lots of study on the Internet, I have learned how to make my life as a vandweller into a wonderful life I want to share that with you.

Customer Reviews

It's been my experience that people who write good books also appreciate good books, so I always pay close attention to the recommendations of authors whose books I've enjoyed. I read RENEGADE CAR CAMPING by Bryan Snyder and loved it. He mentioned that of all the books on car/van camping he'd read, he considered this one by Robert Wells to be the most outstanding. Having read it myself, I heartily agree. This book is a fascinating read, even if you have NO intention of ever living in a car, van, or RV. It's really the story of a man who went through a miserable period and emerged from it stronger and with a true vision of what makes him happy and what doesn't. There is no right or wrong way to live, but each person should have the courage to seek what is right for him or her and then DO IT. Many years ago, Sinclair Lewis's BABBITT was a sensation because it showed the tragedy of a man who had spent his whole life doing what others expected of him. At the end of the book, he advises his son to find his own path and follow it. That's exactly what this author did. In addition to the thought-provoking examination of modern life and how we can adapt it to find happiness and fulfillment, there's a huge amount of practical information on car/van/RV camping (or living) from a guy who's been doing it full time for many years. I loved this book and I'm giving a copy to two young relatives who are headed on a long camping/hiking trip to the Western U.S. I think reading this book in advance will inspire them and give them some great tips. I've read hundreds of e-books and this is one of my all-time favorites.

A lot of the information the author covers in this book can be found on the Internet, but don't forget he's saving you all the stress of digging and finding that information. He also gives you his own personal views on a variety of vehicles, styles, places to camp and that's priceless in helping you to decide IF this is for you, or not. I've been thinking about doing this same thing myself after retiring, which in August of this year I'll be receiving my first retirement benefit check. I love to travel and love the freedom from things that become a necessity to those who own and stay in a permanent location. No property tax, no utility bills, no house insurance to cover maybe hundreds of thousands of dollars in a loss and the high premiums. And for Pete's Sake if I don't like the weather I can turn a key and MOVE at a moment's notice! Loaded with lots of good information and links to find even more information that will be extremely important to help you gather all the information you will need to make that decision for yourself. Worth the investment.

You can read this book or watch a few hundred videos or both, but you will learn basically the same things. It's always good to learn from someone that already knows what they're talking about. I believe Bob fits that description.

Simplify your life. Travel the country on a budget and be happy. An easy read from the father of the RV living life style. Bob Wells is the author and founder of cheapRvliving.com where there is a massive amount of information about vandwelling. Put down the remote, get off the couch, sell everything that doesn't make you happy, buy a van and start living.

What can I say? This book changed my life. It is all about what I always knew I wanted, but couldn't figure out how to get. Bob speaks so eloquently and simply about not just how, but why. Thank you for this book! I quit my "good" job, I feel happier than I have been since being a kid.

Yep, stop planning it! This book will help you clarify your thinking because you can get overwhelmed just trying to answer all the pertinent questions. Bob has lots of answers -- his perspective will lead you to see what it is that YOU want and need. Bob inspires you to just go -- you are missing out if you don't. Get your stuff and go - just take a dry-run trip overnight. Cover the windows with cardboard, or tape some screen over open windows if you're going to a park. Get your sleeping pad and blanket, pillow, sheet -- whatever you need and Bob's book. Take a little box containing a bottle of water, some cheese crackers, an apple, a bottle of Muscle Milk (the kind that needs no refrigeration) and go. If you go to your local state park, you can take a towel bag and bar of soap &

take a shower. That will help think of what you need. Re-read the book, applying what he says to YOUR needs and YOUR situation. and spend the night, Then you'll know what you really need. Think like a backpacker or a motorcycle camper -- equip yourself VERY lightly. This book made me realize that a long road trip can be VERY affordable and restful. It's a wonderful book.

This book not only addresses the ups and downs of van living, it goes into the psychology of it. I gave 4 stars only because it could have had illustration and appendix. The author makes no apologies for the love of the nomadic life and is not only inspiring, he is motivating. I liked it a lot.

Are you a student of this economy or a victim? Read this book and discover a new emerging trend in the RV culture created by this second of all greatest depressions. Yes, it is still possible to travel the country but instead of a gas guzzling motor home or high end truck the answer is simple. Rediscover the self-contained RV lifestyle of the original Full Time RV'ers. Or, if you are just down on your luck then read this book and learn how to rebuild your life while getting out of debt. Sincerely, D.M.
