Horizons: Exploring The Universe, 11th Edition

Synopsis

With their best-selling astronomy textbook, HORIZONS, authors Mike Seeds and Dana Backman help you understand your place in the universe-not just your location in space, but your role in the unfolding history of the physical universe. To achieve this goal, they focuses on two central questions: "What Are We?," which highlights your place as a planet dweller in an evolving universe, guiding you to better understand where we came from and how we formed, and "How Do We Know?," which provides insights into how the process of science can teach us more about what we are.

Book Information

Paperback: 512 pages

Publisher: Brooks Cole; 11 edition (January 2, 2009)

Language: English

ISBN-10: 0495559733

ISBN-13: 978-0495559733

Product Dimensions: 10.7 x 8.9 x 0.8 inches

Shipping Weight: 2.8 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 14 customer reviews

Best Sellers Rank: #210,978 in Books (See Top 100 in Books) #254 in [Books > Textbooks > Science & Mathematics > Astronomy & Astrophysics](#) #538 in [Books > Science & Math > Astronomy & Space Science > Astronomy](#)

Customer Reviews

Michael A. Seeds has been Professor of Physics and Astronomy at Franklin and Marshall (F&M) College in Lancaster, Pennsylvania, since 1970. In 1989, he received F&M College's Lindback Award for Distinguished Teaching. Seeds' love for the history of astronomy led him to create upper-level courses on Archaeoastronomy and Changing Concepts of the Universe. His research interests focus on variable stars and the automation of astronomical telescopes. Mike is coauthor with Dana Backman and Michele Montgomery of HORIZONS HYBRID: EXPLORING THE UNIVERSE, Thirteenth Edition, and UNIVERSE HYBRID: SOLAR SYSTEM, STARS AND GALAXIES, Eighth Edition, both published by Cengage Learning. He was Senior Consultant in the creation of the twenty-six-episode telecourse accompanying the book HORIZONS: EXPLORING THE UNIVERSE, Twelfth Edition. Dana Backman works for the SETI Institute of Mountain View, California, as director of outreach for the SOFIA (Stratospheric Observatory for Infrared Astronomy)

mission at NASA's Ames Research Center. He also teaches introductory astronomy, astrobiology, and cosmology courses in Stanford University's Continuing Studies Program. From 1991 to 2003, he taught in the physics and astronomy department at Franklin and Marshall College in Lancaster, Pennsylvania, where he invented and taught a Life in the Universe course in the interdisciplinary Foundations program. Dr. Backman's research interests focus on infrared observations of planet formation, models of debris disks around nearby stars, and evolution of the solar system's Kuiper Belt. With Mike Seeds, he also coauthored HORIZONS: EXPLORING THE UNIVERSE, Twelfth Edition (2012); UNIVERSE: SOLAR SYSTEMS, STARS, AND GALAXIES, Seventh Edition (2012); and FOUNDATIONS OF ASTRONOMY (2013), all published by Cengage Learning. Dr. Backman earned his bachelor's degree from Massachusetts Institute of Technology and his doctorate from the University of Hawai'i.

I needed this book for school. Otherwise, I wouldn't of bought it. Not of interest to me.

I needed this for my course and it arrived intact and undamaged! This edition worked even though my class required a more recent edition, so utilize that for as long as it lasts. Regardless, it is informative and helped me pass my course.

What can I say? It's what I needed at a great price. Arrived early and in decent condition so I have no complaints whatsoever.

loved it

Class lectures were more interesting than the textbook, since my professor works with NASA JPL. Textbook is well constructed with examples and photos.

Great

This textbook was ordered for my son's Astronomy class. He bought the eBook and it was terrible. So we scrambled around to get him one that he could use. I ordered this book and it came within a few days! We all were very happy about this. The timely arrival of this textbook helped my son very much.

Very good, and kept in contact when my package was missing, I ended up getting my money back for the missing package. Very professional.
