Margaret Beattie Bogue is Professor Emerita of History and Liberal Studies at the University of Wisconsin-Madison. She is the author of many other books and articles on fisheries, wetlands, and agriculture in the Great Lakes region of the United States and Canada including *Fishing the Great Lakes: An Environmental History, 1783-1933*, also published by the University of Wisconsin Press.

1985, this book is now 39 years old - it is middle aged. A person would think this would no longer apply and not be a useful book. Strangely enough, a person would be wrong. The history in this book is still accurate. The towns it talks about are all still there and still beautiful. The things to see and do are still accurate. And it is so simple to follow up with an internet search to find the latest details. Something looks interesting, Google it and verify. You would do exactly that with a more current guidebook. A trip around Lake Michigan is still an amazing thing to do. A nearly forty year old book still does a great job guiding through the smaller towns. Of course it doesn't work very well for Milwaukee or Chicago - things have changed a lot in those cities. Our copy of this book is frayed and dog eared from years of use. It was the perfect companion for friends that just did the full circle

around Lake Michigan.
