ASIN: B000V48RD2

Best Sellers Rank: #20 in Books > Audible Audiobooks > Fiction & Literature > Literary Criticism
#167 in Books > Literature & Fiction > History & Criticism > Movements & Periods

Customer Reviews

I have thoroughly and repeatedly enjoyed the storytelling and the characters in this series, and recently turning my kids on to The Belgariad has been a trip. I cannot wait for Enchanter's End Game to make it to Kindle as well. Soon, hopefully? I do have two minor criticisms, though. First, closer attention to proofreading would be appreciated. I get a chuckle every time I read about 'Zakath and boundless "Mallorca." The Islas Baleares are lovely and definitely worth a visit, but hardly boundless. Now Malloreia, on the other hand... Second, the maps are much too small, taking up perhaps a sixth of a page each. And, if you were waiting for that 188th review to convince you to read this wonderful series, here it is. So what's stopping you?

The first books in this series were necessarily devoted more closely to a few characters - here the perspective branches out and with it so does the story's entire scope. The great machinery of the evolving climax is illustrated in small part to demonstrate the scale of what is happening in the world. It's very satisfying.

The Belgariad series is a good YA series (before there was such a thing as YA!). I've read it about a

dozen times when I was a teenager and loved them as well as the Mallorean. I was glad to see them on Kindle (finally!). They really should have had some of the long-time fans proofread these before they release them into the wild. There are a lot of typos caused by the digitization of the novels. It's glaring to suddenly have people's names misspelled for example. They also release the e-books too far apart. I'd rather they take a few months, get really good proofreaders to proof them, and release them all at once instead of crappy paper-to-digital scans spread out over a year.

Book four of the fantasized Belgariad. In this awe-inspiring book, Belgarath has fought with Ctuchik and his companions are now in possession of the Orb of Aldur. Now they must journey to Riva to place the orb in the Hall Of the Rivan King and fulfill the prophecy. But just as Garion and his companions think they near their journey's end, their destiny is yet to begin. The evil Torak is yet to awaken and Garion is immersed into a destiny which places the world atop his actions. The book's authentic sense of adventure plunges readers into a world of mystery, secrecy and anticipation. I utterly enjoyed reading this book because of its high level of suspense, wonder and imagination. Whilst reading this book, I felt akin a companion on the character's journey and its high level of detail in imagination immediately immersed me into the book. In addition, this book is sterling because of its many surprises and imaginative features along with clever details which create astonishing links between characters and concepts. I would highly recommend this book to people of all ages because its features and concepts will amaze readers of all ages.

I love this series. I've read them a couple of times and still find passages I have forgotten and enjoy.

I have always loved this series, and am so glad it is finally available on kindle. A note to the publishers, though. As I have seen other reviewers mention, there are a lot of typos. The glaring one that has jarred me the most in this particular book is nearly every place the word "Mallorean" is used, it is showing up as "Mallorca". Please fix this!

I love this series! I have read it dozens of times over the years, and I was so glad to see that it was finally released on kindle. It's a Great story that never fails to capture my imagination. However, the proofreading on this release is terrible. Characters names and places are misspelled all through the kindle editions. I went back to my old paperbacks to see if the misspellings were there as well, and they were not. So please enjoy the books for the masterwork that they are and ignore the editing mistakes.

Love this series, been looking for the Kindle version for awhile
