Customer Reviews

I received this book much faster than I had anticipated. The book is wonderful...maps and descriptions of areas that spark my imagination and make me want to get out there and explore!

I was expecting a larger book. I have paid less for similar books at Hudson News located inside the airport, with that said I believe it was over priced. It was sufficient for the research I was doing, but future research material will be acquired differently. Tim

I gave this as a gift. My dad has spent hours looking at the book and reminiscing about places he had been to in Nevada. It gave us hours of conversation.

Lots of places to go and see, planning on traveling in late August. I used Vol 1 when we drove across Hwy 50, nice landmarks

Great info. the book is very interesting and glad to own it. So interesting and easy to follow maps included.

great

This is the companion volume to Paher's Atlas of ghost towns in northern Nevada. Again, there are numerous very good and detailed maps, many excellent if dated photos (they seem to have been largely shot in the 1950s or later, but not recently), and very little text. As such, these atlases are themselves companions to Paher's larger book on ghost towns, and the maps themselves include page references to where to find more information in the larger book on a given town. Visitors to Vegas expecting to trip all over nearby ghost towns will be disappointed; there are fewer decent and interesting sites in the south than in the north. Still, the interested reader needs both atlases and Paher's full study as well.

Compared to its sister volume, which covers the northern half of the state, this atlas is a disappointment. I've spent quite a bit of time plotting all of the ghost town and mining camp sites from both atlases onto DeLorme topo maps, and felt I was really able to pinpoint sites in the northern book, whereas in this one there just wasn't as detailed enough information to confidently do the same. Distances, for example, were given in the northern book, but are missing here; likewise other identifying features like canyon names and smaller streams. It's still an excellent source, and the two atlases together locate all the sites detailed in Paher's classic NEVADA GHOST TOWNS AND MINING CAMPS. The atlases also contain quite a few photographs.
