Person-Centered Nursing Care Plan Manual For Adult Day Services

Synopsis

The only nursing care planning book available for Adult Day Services is now available in a Person-Centered Care version. Featuring more than sixty care plans, covering the most common problems seen in the Adult Day Setting. This manual has been updated to ensure the most current clinical and person-centered care standards. It is easy to read and understand, organized by both PCC nursing diagnosis and disease-specific problems most often treated in the Adult Day Center. This manual supports the nursing staff to quickly and simply develop individualized, person-centered care plans for all participants. It is difficult if not impossible to try to adapt care plans intended for another setting, such as skilled nursing facilities or hospitals; this manual was developed by those in the Adult Day Industry, for the Adult Day Industry. Includes: • Introductory chapter explains fundamental concepts of person-centered care planning in the Adult Day Center, components of a care plan and how to ensure the care plan is individualized and useful. • Each care plan includes multiple choices for the problem statement, goal statement and interventions; supporting the staff to develop the most individualized care plan possible. • Care plans in the nursing diagnosis section include care plan suggestions for other members of the treatment team to support a "team" approach and to help ensure improved outcomes.
