Peter Linenthal has taught art in elementary schools for almost thirty years. He lives in San Francisco, California.

My baby has loved the black and white pictures in this book since she was about a month old. She is now 4 months and this book is still one of her favorites. The words and pictures are simple enough to hold her interest. The book is also a good length for a baby's short attention span. I added braille labels with picture descriptions to each page of this book. My husband and I are both blind, but our baby daughter can see. The labels enable us to know what is in each picture so that we can talk with our daughter about what she is seeing in the book. We do this a lot with board books so that we can make a better reading experience for our baby. The pictures in this book were just simple enough that it didn't require much description-writing.

The high contrast pictures are perfect for very young infants, as their sight is still not good, and they see black and white images best.

Our daughter is four months and has LOVED this book. We've "read" it to her since she was just weeks old and she loves to look at the pictures. We always keep this in the diaper bag, and I've purchased a few as gifts as well.

The Peter Linenthal black and white books are some of my favorite books to give as gifts for new babies.

Baby loves to follow along as I describe the pictures and read these high contrast books to him. We've been able to see him paying attention since we bought them when he was 5 weeks old.

great for small babies...just look at pictures.

Beautiful, just like all the books by this author! Great for eye development, and even older babies like to look at them for years.

My daughter prefers the more detailed art in books such as "Jane Foster's Black and White."
