John C. Vanden-Heuvel, Sr., is a web designer with more than 20 years of experience in publication design. He is the author of CSS for Babies and HTML for Babies. He lives in New York City.

My husband and I are both web designers, so we were ordered this book as a Christmas gift for our daughter. Sadly we then discovered that some pages contain code that is not valid - tags being closed without opening, opening without later being closed, etc. After mentioning this to the author on their Facebook Page, they confirmed that was not a mistake, and that due to layout issues they were not always able to fit all the proper tags onto a page/spread. For a book that is supposed to introduce babies/children to the basics of HTML, we find that very disappointing, and therefore decided to return the book. Others may think this harsh, but would you want to introduce your child

to a foreign language or math or geometry, or any other subject for that matter, using a book that has errors/omissions on the most basic level?We commend the author for their idea, but there must be some way to fit valid code into the layout!

I am a nerd and I wanted to ready nerdy books out of fun to my baby so I got this. It is fun and the baby loves all the color in the book.

Bought as a gift for a clolleague. I'm not sure why parents would want their babies to learn html, but okay why not? 5 stars.

Very said that most of the code on this book is wrong/invalid html. The author should probaly learn the basics of HTML before deciding to write anything about it. Even if it for children the least I espected was this book to have a correct syntax.

Bought this as a baby shower gift, since 3 of us are coders and 1 is a copywriter. The couple absolutely loved them. Gotta get them coding early!!!

very cute, sweet text within, sturdy pages for baby hands

This book is such a great gift for a computer guy like mine! We are expecting our first baby and I wanted to get him something that he could relate to lol, it's so sweet!

The dad thought it was "the best gift"!!
