Customer Reviews

"I love how it's separate by categories. Basic addition and subtraction in the beginning, then moves on to multiplication and division, then on to decimals." "Concise; easy to administer."

William R. Pasewark, Sr., earned the PhD at New York University. He taught both Business and Education courses at NYU, Michigan State, Penn State, and Texas Tech. Pasewark authored 105 best-selling business and computer books, seven of which won Texty Awards from the Text and Academic Authors Association. Work experience includes several jobs in the Wall Street section of NYC; Office Management Consultant; Marine Corps Sergeant in the Iwo Jima Invasion; General Manager of Pasewark LTD, a textbook authoring family partnership. Pasewark lectured in 31 states and several foreign counties. He attended 60 continuous NBEA conventions and was a registered lobbyist to require business courses in high schools.

I like it.

The book is OK & the instructions are not very clear since all calculators are different I guess!

This book more than met my expectations for my class. I ended up with a very strong A out of my class, as the instructions given for each section was very well written.

I am very happy with my purchase. Thank you!

As advertised and received in timely manner

This is a very good bargain compared to new at the campus. I have bought off here for over 2 yrs now for my college books. With no problems.

It is what I needed for class. It was very cheap compared to the college's bookstore. Plus I got it right away.

it really helps you with things in the "real world" but i won't say that i have a great love for math, haha. either way, you'll learn well!
