World Regional Geography

Synopsis

The sixth edition of *WORLD REGIONAL GEOGRAPHY* offers you a rich cultural and physical geographic understanding of the world's eight regions. In the text's "Profile" chapters, the author presents brief, thematic overviews for each of the eight regions. Subsequent regional chapters present traditional, current details on a local level, including geographical factors and in-depth observations. The art program offers many new and revised maps, as well as photos submitted by the author that depict cultural and geographic aspects of the world's eight regions. New and extensively revised thematic maps centered on topics like language, religion, and ethnicity allow you to make cultural and regional comparisons quickly. You have access to these maps electronically for further study and use in the classroom. Clearly outlined chapter objectives emphasize more thematic discussions in the subregional chapters as well as highlighted textual discussions. The author also ties in relevant historical geography to give you a context for current events and geopolitical issues in the world.

Joseph J. Hobbs received his B.A. at the University of California Santa Cruz in 1978 and his M.A and Ph.D. at the University of Texas-Austin in 1980 and 1986. He is a professor at the University of Missouri-Columbia, and a geographer of the Middle East with many years of field research on biogeography and Bedouin peoples in the deserts of Egypt. Hobbs's interests in the region grew from a boyhood lived in Saudi Arabia and India. His research in Egypt has been supported by

Fulbright fellowships, the American Council of Learned Societies, the American Research Center in Egypt, and the National Geographic Society Committee for Research and Exploration. He served as the team leader of the Bedouin Support Program, a component of the St. Katherine National Park project in Egypt's Sinai Peninsula. His current research interests are indigenous peoples participation in protected areas in the Middle East, Southeast Asia, and Central America; human uses of caves worldwide; and the global narcotics trade. He is the author of *BEDOUIN LIFE IN THE EGYPTIAN WILDERNESS* and *MOUNT SINAI* (both University of Texas Press), co-author of *THE BIRDS OF EGYPT* (Oxford University Press), and co-editor of *DANGEROUS HARVEST: DRUG PLANTS AND THE TRANSFORMATION OF INDIGENOUS LANDSCAPES* (Oxford). He teaches graduate and undergraduate courses in world regional geography, environmental geography, the geography of the Middle East, the geography of caves, the geography of global current events, the geographies of drugs and terrorism, and a field course on the ancient Maya geography of Belize. He has received the University of Missouri's highest teaching award, the Kemper Fellowship. In summers from 1984 to 1999, he led "adventure travel" tours to remote areas in Latin America, Africa, the Indian Ocean, Asia, Europe, and the High Arctic. Hobbs lives in Missouri with his wife Cindy, daughters Katherine and Lily, and an animal menagerie.

I purchased this book while taking a college level geography course while on my quest to become a certified teacher. This book is an easy read for the purpose of quick references; and good for gathering information for middle/high school level reports. The author Joseph Hobbs covers the physical geography, human adaptations, climates and biomes of each world region in this work. In addition, there are easy to read historical backgrounds on most countries. I recommend this book for students on every grade level and higher education.

I needed the book for a class. There's some writing in it but the book is still functional. The school bookstore was selling it for \$177 USED. So I rented it for 20 bucks from . Can I get an AMEN!?

In good condition overall. The binding was a bit damaged, but still functional and sturdy.

This is the first time I used this site to order a book. I must say that I was very pleased with the purchase. The World Regional Geography book was in great condition. The price was good. It did arrive at the address I needed it to in a timely manner.

was not for me to read

Accurate description, good quality, fast shipping

It appears to be good from what I've read. It is very structured and uses an intuitive division of the world into regions.

good book
