Turn-of-the-Century Doors, Windows And Decorative Millwork: The Mulliner Catalog Of 1893

Synopsis

In the late nineteenth century, the Mulliner Box & Planing Company of Quincy, Illinois, provided its customers with an abundantly illustrated catalog displaying an immense and varied supply of interior and exterior millwork elements. This unabridged republication of that now-rare document offers unparalleled insight into the style and appearance of an extensive variety of decorative woodwork items that provided finishing touches to houses, cottages, churches, and offices in days gone by. Included is an enormous array of material – from window frames and sashes to church pulpits and pew ends. Nearly 300 finely detailed illustrations are accompanied by captions that provide descriptions, dimensions, and prices for such diverse items as doors, blinds, moldings, stair work, mantels, embossed and cut glass, brackets, scrollwork, wood drapery, balustrades, and much more. Home restorers, preservationists, antiquarians, architectural historians, nostalgia buffs, and anyone interested in the buildings and building styles of a century ago will welcome this volume for its factual precision and the delightful opportunity it offers for browsing.

Customer Reviews

I'm a nerd for antique millwork so I LOVE this book. It's from 1893, and predictably the products it depicts are heavy on Victorian frills. Craftsman is more my taste, so I'd love it if they'd release something similar from the 1910's. Still really awesome seeing the old molding profiles, sash construction, what sorts of glass was available, etc.

Exactly what I needed for my project

This is a great book. If you are looking for vary detailed elements this book is great. It has good drawings and dims are OK

great book

A gift for a colleague who owns a window and door business. He loved it!

This is apparently a reprint of one of the really great old catalogs of Victorian Millwork! It has fabulous designs for window ornamentation, verandas, brackets, gable ends, fireplace mantels and most especially doors. Black & White sketches show an impressive variety of ideas.

This is a good reference to the time period. This is not a "how to" book but rather a period catalog expertly reproduced. This book is good for someone who is interested in creating a home with elements from the late Victorian era.
