Customer Reviews

Love the way the book is written- great for captivating young readers

Lots of quotes from Marie Curie were included in the text. Emphasized hard work, sacrifice, achieving goals, and persisting for years. Illuminates life in occupied Poland. Captivating!

This book is well-written for the age-group for which it is geared -- maybe 4th-6th grade. It's an excellent introduction to physics and the life of Marie Curie, along with some world history to boot. I highly recommend it.
