Bruce Warren taught photography at the college-level for more than 25 years. His participation in the Fulbright Teacher Exchange program took him to the London College of Printing in England. Warren earned a Master of Fine Arts in Photography from Ohio University and his work has been exhibited at galleries throughout the U.S.

I was required to get this book for class, and given the option to either buy it or rent it for half the cost. I'm really glad that I bought it though, because it has just about everything you need to get started with digital photography. It has step by step instructions, high quality images that show you

what it's talking about, and lots of useful information for any photographer-especially a new one! I'm just glad I get to keep it.

perfect condition and came quickly

I'm renting the kindle version of this book for a class, and I've been sorely disappointed with the quality. The first thing I noticed is that the picture quality is terrible, which is laughable in a photography book, and they're blurry at all zoom percentages. This is even more frustrating when trying to read the charts, which is literally impossible because of this book's terrible image quality. I've also encountered one image (in chapter 8) which was missing. A gray box replaced the photo with a message about not including the image for copyright reasons. Since I'm paying to rent the book, that makes no sense. Overall, I've only had bad experiences with this book, and I usually love Kindle books.

This is a great resource and explains everything nicely. Bought it for photography classes I took in college. Kept it in my collection. Vendor provided great service.

I got the kindle version, very handy to bring along with when you are shooting and to class. The only disadvantage is when the instructor says to flip to a certain page number. It's hard to determine exactly what page it is at first. It is a good guide so far, easy to understand.

Great!!

Very informational.

I think the book was very helpful alongside my instructor. I hope you all have as much fun as I did
