Multiplication 0 To 12 Flash Cards (Brighter Child Flash Cards)

Synopsis

Brighter Child® Multiplication 0 to 12 Flash Cards offer children a fun and easy way to practice their multiplication skills. The set features 54 cards with two multiplication problems each, their answers on the opposite side. Bright, bold numbers are placed on a white background for easy reading, and a special card also offers creative game ideas designed to reinforce learning. The popular Brighter Child® Flash Cards give children a fun and easy way to practice important skills. Offering 24 titles encompassing preschool to grade 5, each title focuses on an important subject including early concepts, math, phonics, and U.S. History. Fun game ideas and learning suggestions are included to help children build proficiency and confidence. Game cards also allow children to develop thinking, decision-making, turn-taking, and social skills while playing fun games at the same time. Select titles are also available in English-Spanish and Spanish-only versions.

Age Range: 8 - 11 years

Grade Level: 3 - 5

Customer Reviews

This was exactly what we needed to get ready for 3rd grade. Multiplication flash cards were on on my sons supply list so I bought them from since I could not find in local stores. These flash cards are easy and exactly what we needed. We have already been practicing with them. I know these are going to make our transition to multiplication easier. Very fast shipping since it is a Prime item.

Great cards - Happy to use these for my 3rd grader's multiplication facts since common core seems to believe that we do not need to teach our kids multiplication tables anymore. Whether you're a carpenter, physicist or physician, it's still imperative to have instant recall with your multiplication tables rather than as yourself why $7 \times 7 = 49$;) 5 stars since all the answers were correct - Tough to rate them any less!

These are great flash cards for my third grader to remember her math facts. One side is more laminated and the other more matte. The problem and solution are written on the back in small font so that you can see the problem and answer while showing the flashcard.

Easy to use for a child learning math. Don't hold it up to light though, my daughter was gaming me by reading the answer through the cards for awhile. However, these flash cards are great if you are teaching mathematics to your child.

As a Dad that works from home and teaches my son when he gets home this is a must have. He will be ahead going into 3rd grade next year!

Helps with learning times tables.

I bought a class set of these so students could partner up and practice their facts. They worked great and held up nicely.

I got these to brush up on multiplication tables with my sons. They are good quality, and I'm happy with the purchase.
