Prehistoric Atlas: A Voyage Of Discovery For Young Paleontologists

Synopsis

Travel to a land before time and learn all about about Earth's origins, dinosaurs, and evolution! No need to build a time machine to see how Earth began; starting with the Big Bang, this expansive atlas takes a thrilling journey through Earth's history from the Paleozoic era to the Quaternary era. Along with six large foldout pages and six bound-in booklets, it features full-color illustrations depicting the flora and fauna of each particular time period and a fun introduction to the animal kingdom and scientific terms. Young paleontologists will happily spend hours discovering more about their world.
