Meet Einstein

Synopsis

Meet Einstein. He is a scientist who loves to study light and gravity. Einstein helps to introduce your kids to science, and show them that they are already great scientists! Light and gravity are concepts that preschoolers are ready to learn. Help them make the connections in everything they see and do, and teach them that science is all around them. RECOMMENDED FOR AGES 2-5

Mariela Kleiner was inspired to write this book when her daughter Hailey chose a grown-up book for her bedtime story, which happened to be Einstein's book, "Relativity." She currently lives in Northern California with her husband and two children. Viviana Garofoli was born in Buenos Aires, Argentina, where she currently lives with her husband and two daughters. Over the past 15 years, Viviana has illustrated over 20 children's books and has created illustrations for various editorials and textbooks.

This book has little to do with Einstein. It mentions him, but doesn't really explore his life or process as a scientist at all. I am also a little disturbed that the "facts" at the back of the book are all sourced from his Wikipedia page from 2009. For someone publishing an actual book, please take the time and effort to do real research.

We bought this book for our 5 year-old daughter. Daddy is an engineer and I'm a lawyer. We're pushing her toward science and engineering. We're working with her on science experiments at home and getting her excited about the STEM areas of education. This book is very good at explaining the basic concepts of what Einstein was known for -- gravity, light etc. She enjoyed it. It's never gonna be as exciting as Pinkalicious stuff or princesses, but it's pretty good nonetheless. :)

I read this to all my Kindergarten and first grade students. They really loved the pictures. It lead into a great conversation afterward about "what is a scientist?" but I'm not sure they would pick this book up for the story itself.

Bought this for my 5 year old grand daughter. It is an understandable introduction to a very deep subject. She found it inspiring. Wants to be a scientist (along with being a princess) when she grows up.

The book was great, but I had already taught my kindergartners about the relationship of the sun and the earth, so it was disappointing to see the page about the sun. The book was almost nonfiction!

I loved the simplicity of the writing and the detailed, colorful and yet friendly illustrations. A great reading opening activity for a "I am a Scientist" unit. Holds little ones attention. This book is aLso EFL friendly (English as a Foreign Language).

My daughter loves this book.

Simple and effective way to teach young children. I also used an Einstein puppet while reading that made it even more fun for my class!
