Acing Property (Acing Series)

Synopsis

This study aid uses outline-like checklists to lead students through the analytical steps necessary to evaluate and resolve property issues. Each chapter begins with a review and explanation of the important rules, concepts, and principles that govern a particular area of property law. The review material is then synthesized into a checklist. Each chapter concludes with practice problems and solutions that illustrate how students can use the checklist to analyze property issues when writing their exams. The systematic analytical approach represented by the checklists in this book is unique among study aids.

This is a great supplement for the 1L year. All of the "Acing" books are well written, concise, and matter of fact. The entire series follows along with the general curriculum of classes (keep in mind that every professor teaches in the order he/she feels is best). This Property edition is no exception, it is not exact to the book my professor teaches, but it is a solid supplement to the themes and material taught in the course.

Cali'd property by studying professors past tests and reading this book. I did read the entire book in one day though. Good luck.

The book is fine for a very basic understanding of property. However it does not dovetail any of the

information. Further, the typical hardest part of any property class is the present and future interests which this book slaughters. It abbreviates everything, does not go into the differences nor does its graphs help explain anything. Stick with the Nutshell or Crunch Time books.

An absolute must have for 1L's or those preparing for the bar. Property quick and easy!

love this series

Not as helpful as the others in this series. Contradictory to some of the material in class but that could be style type.
